VERSA  **BAR**

CONTINUOUS CAST IRON IN THE U.S.

versa-bar.com

1-800-544-4800

Versa-Bar continuous cast gray and ductile iron is metallurgically superior to conventional sand cast iron. It's an excellent alternative to steel.

LOWER COSTS

Versa-Bar needs less machining and creates less scrap. That means lower costs!

QUALITY

The unique continuous cast process yields a more consistent microstructure. Versa-Bar is free from defects like porosity, inconsistent hardness, and inclusions that jeopardize the part's integrity.

PERFORMANCE

Versa-Bar is favored for its machining and operational integrity.

SERVICE

We take pride in providing the best service possible. From rapid quote response to competitive pricing and on-time delivery, you'll be fully satisfied.

PROCESSING SERVICES

- Cut-to-Length
- Boring
- Milling
- Plate Cutting
- Turning
- Machined Complete

SELECTION

V2 Gray Class 40 (ASTM A 48)/V9 GMI (Gray Glass Mold Iron)

Pearlitic/Ferritic structure with high mechanical properties, good surface finish, and hardenability (Well suited for pressure applications such as hydraulic components).

V3 Ductile Iron 65-45-12 (ASTM 536)

Ferritic/Pearlitic structure with excellent machinability, fine surface finish, and high strength similar to 1020/1030 steel.

V4 Ductile Iron 80-55-06 (ASTM 536)

Ferritic/Pearlitic has a balanced structure with higher strength, similar to 1040/1045 steel. Good machinability with good surface finish and excellent wear characteristics.

SHAPES AND SIZES

- **Rounds:** to 20"
- **Tubes:** Stock and custom I.D.s with O.D.s up to 22"
- **Squares:** up to 25"
- **Rectangles:** Stock and custom cut available up to 16" x 22" x 72" and 10.50" x 25" x 82"
- **Shapes:** Custom cast to your design

Note: Standard length 72" (Lengths may be available up to 144" upon request)

About Us

Lawton Versa-Bar supplies raw and machined continuous cast iron and custom components to a wide range of industries—from fluid power to bearing manufacturing.

Since 1982, we've delivered high-quality metal products from our Waukesha, Wisconsin facility (formerly known as American Iron & Alloys or AIA), combining competitive pricing with responsive, service-focused support.

In 2022, we became part of The Lawton Standard Co. family, expanding our capabilities and offerings. Our growth continued in 2024 with the addition of a Houston, Texas location, allowing us to serve more customers, more efficiently.

As a member of the Lawton Standard family, we're proud to offer broader solutions and greater value than ever. Let's talk about how we can support your business.
